

*"Quality without Compromise"*

## MAKE WAVES WITH THE PURSUIT 600 CHALLENGER

### Press release

November 2008

After extensive planning, design and meticulous testing, **Pursuit Boats** of Noosa are proud to launch the **600 Challenger**. The **600 Challenger** is a stylish, 6 metre, half cabin, trailer boat that is bound to make waves in the boating industry. Its multi purpose design can be tailored for fishing, sport or leisure and the sleek styling and luxury features will set the benchmark for other boats in this class.

The **Pursuit Boats** design team has combined their years of industry experience, extensive sea trials, boating know how and customer feedback to create the ultimate boating experience. "We have been developing the 600 for a long time now and we are very excited about this launch. This competent blue water boat is perfect for offshore fishing, sport and leisure or to just cruise the waterways with the family. It is ideally sized for a couple or family, but also easily managed by a single boatman. Its ease of handling and sturdy construction mean that it is easily launched and retrieved and you don't need a 4x4 or V8 to tow it, just a standard 6 cylinder vehicle" said Brett Kruger from Pursuit Boats.

The **600 Challenger** is a directional boat, with exceptional handling in following and quarter seas. The unique hull design maintains a very dry cockpit and comfortable dry ride, which is one of the main feed backs from owners. The hull length and great internal width makes this boat a soft ride in good conditions and stable and surefooted in adverse conditions. The powerful and reliable Suzuki four-stroke outboard 150hp motor, powers through rough seas and easily gets up on the plane under 3000 rpm, for excellent fuel economy.

Each boat has many standard options that other brands consider as extras. Hydraulic steering, cabin and cockpit lighting, padded side combings, to name a few. There is a roomy cabin, which converts into one large sleeping area with the addition of infill cushions. For versatility and comfort removable back seats, removable walk through door, and seat risers with sliders and swivels. An under-floor foam core fill and built in fire extinguisher box reflects the **Pursuit Boats** focus on safety for this family friendly boat.

For the keen fisherman every detail has been thoroughly researched, from a fully plumbed live bait tank with in built light and aerator pump and built in cool box with thru floor draining. The good toe room and high gunwales ensure a feeling of security and confidence at sea. Optional overhead rod holders and additional extras are also available to create a dream fishing boat for the dedicated fishing fanatic.

With **Pursuit Boats**, now **marketing factory direct**, each **600 Challenger** can be tailored to each client's individual specification and requirements. This boutique boat builder believes in building a strong relationship with customers, regularly liaising during the boats construction to achieve the perfect fit out. **Pursuit Boats** is an Australian owned company, so you can be assured of the finest craftsmanship. Each boat is constructed and built on the Sunshine Coast, unlike the larger or overseas manufacturers. With **Pursuit Boats** you can be assured that customer service, after sales care and back-up care is paramount, and this is what the team at **Pursuit** pride themselves on.

The **Pursuit 600 Challenger** offers fantastic value for money and premium quality on a boat that holds its value for resale. The **Pursuit 600 Challenger** is ideal for everyone from extreme sports fishermen, to weekend family trips. So why not make waves this summer with the new stylish, sophisticated and luxurious **600 Challenger**.
